

Timely Turf Tips

December 2010

HAPPY HOLIDAYS from all of us here at Hugo Feed Mill! We'd like to thank you this holiday season for your continued patronage. There is huge competition between online stores and the big box stores for the deepest sales, and the coupons that give away the deepest savings discount. Small businesses are often left out. That's why we are particularly grateful to you and your support of our family run business. We would like to help out with your Christmas shopping with gift ideas from the Mill.

Red Steer Gloves: Our most popular gloves! Heat saver gloves have full leather forefinger and fingertips, brushed micro-fiber lining, knit wrist or safety cuff. If you know a guy, he wants these gloves.

Bird Feeders make wonderful gifts for everyone on your list! Hang outside a window to entertain the whole family including the cat! Never underestimate the impact of providing and maintaining bird feeders at your local hospital or retirement home. Wild bird feeding can become a point of interest and conversation if the main lounge or community room has several bird feeders right outside the window. Many people who can no longer go outdoors or get around easily find much more joy watching the birds at their window than watching television.

Golden Organic Safflower, NutraSaff™ is an amazing new birdfeed. It has no outer shell; has a higher seed oil, protein, and fat content providing higher energy sources with less waste than any other birdseed product. Since it is a new seed that the birds are not familiar with, it will take time for them to be attracted to this seed. I found filling all my feeders with golden safflower; the birds were devouring this seed within a week. And the best part? Squirrels and deer were not interested!

Steam Canner: Around the country, canning is enjoying a resurgence. The maker of Ball products says sales of canning jars and supplies are up 30% this year. A Steam Canner is smart alternative to the water-bath canning method; this generously sized canner harnesses the power of steam to quickly preserve freshly harvested fruits and vegetables, using less water and saving both time and energy. The 7-quart unit's shallow water pan features a removable rack, which holds up to seven pint- or quart-size jars--great for large batches of jam, salsa, applesauce, and more.

Stocking stuffers or make your own gift bucket: batteries, light bulbs, tape, glue, Hanks Soda, Strike Anywhere matches, pickle pincher, outdoor thermometers, garden hand tools, candy, Australian licorice, etc!
